

ORGANADRY

ALL NATURAL

LIQUID ABSORBENT

The premium, silica-free absorbent that's perfect for any liquid spill. Engineered with a small particle size and high absorption capacity, this product is ideal for mitigating spills of all kinds

ALL-NATURAL

Made from a plant. A truly green product. No chemicals, polymers, or toxic ingredients.

HIGH ABSORPTION

30x more absorbent than clay or quartz based products. Works on most spills.

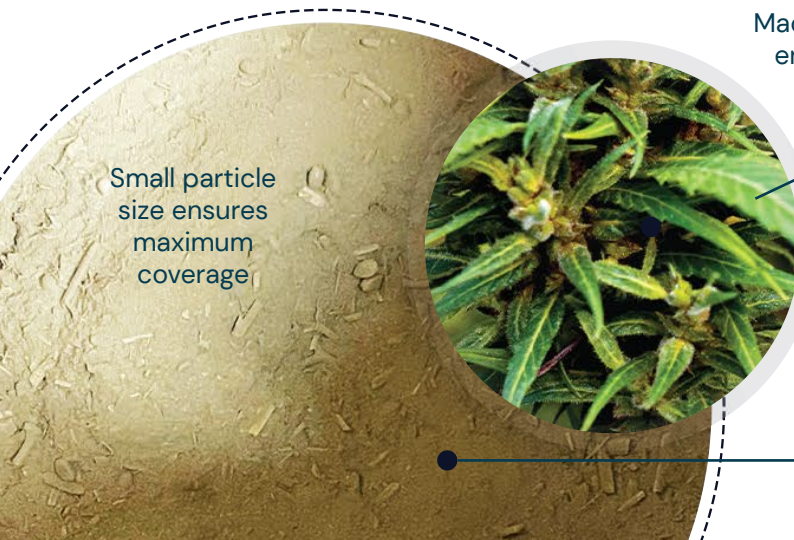

EASY CLEAN-UP

With no mess left behind, it's a breeze to sweep up.

REDUCES WASTE

100% Biodegradable. Environmentally friendly & green initiative qualifying.

Small particle size ensures maximum coverage

Made from hemp & environmentally friendly

Soaks up more volume by weight than any other product on the market

WHY CHOOSE US?

Organadry is the perfect solution for cleaning up any liquid spill. Its small particle size ensures maximum coverage and absorption, while its biodegradable formula makes it safe for use around people and pets. So don't worry about that oil or diesel fuels spill—Organadry has you covered!

Switching to **OrganaDry** saves your company **time** and **money** while **reducing waste!**

100% BIODEGRADABLE

It's easy to forget the hidden environmental cost of our everyday actions. For example, did you know that the average person produces over four pounds of waste every day? And while some of this waste can be recycled or re-purposed, a large portion of it ends up in landfills where it will stay for centuries. With society constantly evolving, it is important now more than ever to be conscious of the waste we produce and how it affects the earth.

How much waste do our clients and competitors produce?

"Client A"

83k lbs
per week

4M lbs
per month

100m lbs
in 25 Years

"Competitor B"

1.5 Billion lbs
a year

39 Billion lbs
over 25 Years

39 Billion pounds is equivalent to the volume of 1 Billion refrigerators!

That's why OrganaDry offers a biodegradable solution for oil spills and more. By choosing OrganaDry, companies can clean up their spills without adding to the already staggering amount of waste in our landfills. So, next time you're considering your environmental impact, take a look at the bigger picture. You may be surprised at how much waste you produce and how your small actions can have a big impact on the earth.

Don't worry,

there is some good news. Companies are beginning to realize the environmental cost of their waste and are taking steps to reduce their impact.
